

# KRUUSE Digi-temp Express

## - Digital Thermometer

Thermometer in supreme quality, primarily for large animals

- Measuring time < 15 sec
- Temperature range 32-44°C
- Accuracy +/- 0.1°C
- Display of last measured value
- Watertight
- The battery is good for 2000 measurements
- Auto power off: After approx. 3 minutes of inactivity
- Self-test: Automatic internal check of test value 37.0°C

### Special features

KRUUSE Digi-temp Express is a maximum thermometer, i.e. the highest temperature is displayed within 15 seconds. The most recent measured value is always saved.

The thermometer is automatically checked for correct functioning every time it is switched on. All segments are displayed, and then L°C.

If a failure (measurement inaccuracy) is recognized, "ERR" (Error) is shown in the display.

Measuring range is 32.0°C to 43.9°C.

Temperature below 32.0°C: display "L" for low.

Temperature above 43.9°C: display "H" for high.

Self-test: Automatic internal check of test value 37.0°C.

In case of deviation > 0.1°C, "Err" will be displayed.

Cat. No 291114
